

## Health and Safety

### Emergency Procedures and First Aid

- Safety is Connect Its' Top Priority
- Noticeboards are located around the building and these contain relevant health and safety information
- We have several Fire Wardens and First Aiders – if you need help please ask
- Fire Alarms are tested every Wednesday at 8am
- Should you hear the fire alarm at any other time, you will be directed by a Connect It employee to leave immediately by the nearest exit
- DO NOT USE THE LIFT
- The muster point is at the front of the building, across the road to the right, outside of this brick building below (be careful as you cross the road).

If you would like more information relating to our Health and Safety procedures, please speak to your Connect It representative.
